

SYSTEM FOR INTRAPERITONEAL PERFUSION

Description: Made of biocompatible and non-toxic polymer material, resistant to pressure, impact and temperature variations and also to chemical and biological agents. It comprises a solution storage reservoir, high performance heat exchanger and multi-hole cannulas for infusion and drainage.

Indication: It is intended for storage, thermal conditioning and intra-peritoneal delivery of solutions in procedures of cytoreductive surgery. The product permits the thermal conditioning of solution, infusion and intra-peritoneal drainage, by means of cannulas.
